

PUPPY CLASSES ONE THROUGH SIX

The main objective in puppy training is observation and timing. Scheduling meal times, socialization with humans and other animals, mouthing resolution, prevention of over bonding with other dogs and elimination habits. This class will be broken down in six weeks because most puppies require exposure to other dogs (trained and monitored play time) to enhance temperment and social tolerance.

The following basic commands will be taught.

Sit

Stay

Down

Command Chaining

Temperament
